INDEX TO VOL. I.

SUBJECTS.

PAGE.

ALUMINIUM, Short Wave-lengths of the Spark Spectrum of. *C. Runge* 433

T ANDROMEDÆ. *E. C. Pickering* - - - - - - - - - 305

AQUILA and Cygnus, Distribution of Stars and Distance of the Milky Way in. *C. Easton* - - - - - - - - - - 216

ARGON, Spectrum of. *H. F. Newall* - - - - - - - - 372

ASTROPHYSICAL JOURNAL. *George E. Hale* - - - - - - 80

ATMOSPHERE, Determining the Extent of a Planet's. *W. W. Campbell* 85

ATMOSPHERIC Bands in the Spectrum of Mars. *William Huggins* - 193

AURIGÆ, NOVA, Recent Changes in the Spectrum of. *W. W. Campbell* 49

BERYLLIUM and Boron, Arc-Spectra of. *H. A. Rowland and R. R. Tatnall* - - - - - - - - - - - - - 14

BORON and Beryllium, Arc-Spectra of. *H. A. Rowland and R. R. Tatnall* - - - - - - - - - - - - - 14

BREWSTER'S Views as to the Tranquillity of the Solar Atmosphere. *Egon von Oppolzer* - - - - - - - - - - - 260

δ CEPHEI, Spectrum of. *A. Bélopolsky* - - - - - - - - 160

CHICAGO Academy of Sciences, Meeting of the Sec. of Astr., Math. and Phys. *T. J. J. See* - - - - - - - - - 86

COLOR of Sirius in Ancient Times. *W. T. Lynn* - - - - - 351

COPPER, Arc-Spectrum of. *H. Kayser* - - - - - - - - 84

CORONA, Exposure Required in Photographing without an Eclipse. *George E. Hale* - - - - - - - - - - - 438

Method of Mapping the. *George E. Hale* - - - - - - 318

Some attempts to Photograph the, at Mount Etna Observatory. *A. Riccò* - - - - - - - - - - - - - 18

CYGNUS and Aquila, Distribution of Stars and Distance of the Milky Way in. *C. Easton* - - - - - - - - - - 216

DOME, Combination Telescope and. *A. E. Douglass* - - - - 401

ECLIPSE of Jupiter's Fourth Satellite, February 19, 1895. *E. C. Pickering* - - - - - - - - - - - - - 309

ECLIPSES of Jupiter's Satellites, Photographic Observations of. *Willard P. Gerrish* - - - - - - - - - - - - 146

ELECTRIC Motors for Constant Speed, Design of. *F. L. O. Wadsworth* 169

ES.-BIRM. 281, Variability of. *T. E. Espin* - - - - - - 351

PAGE.

GERMANIUM, Arc-Spectrum of. *H. A. Rowland and R. R. Tatnall* - 149
HELIUM, Terrestrial - - - - - - - - - - - 439
Z HERCULIS. *N. C. Dunér* - - - - - - - - - - 285
INTERFERENCE Fringes, Photographic Method of Determining Visibility of. *George E. Hale* - - - - - - - - 435
JUPITER'S Fourth Satellite, Eclipse of. *E. C. Pickering* - - - 309
Satellites, Photographic Observations of the Eclipses of. *Willard P. Gerrish* - - - - - - - - - - - 146
LENS for Adapting a Visual Telescope to Photographic Observations with the Spectroscope. *James E. Keeler* - - - - - 101
Photographic Correcting, for Visual Telescopes. *James E. Keeler* 350
LICK Observatory, Large Reflector for the. *Edward S. Holden* - 442
LITTROW Spectroscope, Pulfrich's Modification of the. *James E. Keeler* - - - - - - - - - - - - - - 353
LONGITUDES, Martian. *Percival Lowell* - - - - - - - 393
MARS, Atmospheric Bands in the Spectrum of. *William Huggins* - 193
Cloud-like Spot on the Terminator of. *A. E. Douglass* - - 127
Observations of, with the Melbourne Great Telescope. *R. L. J. Ellery* - - - - - - - - - - - - - 47
Spectrum of. *Lewis E. Jewell* - - - - - - - - 311
MARTIAN Longitudes. *Percival Lowell* - - - - - - - 393
METEORIC Constitution of Saturn's Rings, Spectroscopic Proof of the. *James E. Keeler* - - - - - - - - - - - 416
MILKY WAY, Distance of. *C. Easton* - - - - - - - - 216
Photographs of. *E. E. Barnard* - - - - - - - - 10
MODERN SPECTROSCOPE. X. General Considerations Respecting the Design of Astronomical Spectroscopes. *F. L. O. Wadsworth* - 52
XI. Some New Designs of Combined Grating and Prismatic Spectroscopes of the Fixed-Arm Type, and a New Form of Objective Prism. *F. L. O. Wadsworth* - - - - - 232
XII. The Tulse Hill Ultra-Violet Spectroscope. *William Huggins* - - - - - - - - - - - - 359
MOTORS for Constant Speed, Design of Electric. *F. L. O. Wadsworth* - - - - - - - - - - - - - 169
NOVA AURIGÆ, Recent Changes in the Spectrum of. *W. W. Campbell* 49
OBJECTIVE Prism, New Form of. *F. L. O. Wadsworth* - - - 232
PECULIAR Spectra, Stars having. *M. Fleming* - - - - - 411
PHOTOGRAPHIC Correcting Lens for Visual Telescopes. *James E. Keeler* - - - - - - - - - - - - - 350
Method of Determining the Visibility of Interference Fringes. *George E. Hale* - - - - - - - - - - - 435
Observations of Eclipses of Jupiter's Satellites. *Willard P. Gerrish* 146

PAGE.

PHOTOGRAPHIC Spectra of Variable Stars. *E. C. Pickering* - - 27
PHOTOGRAPHING the Solar Corona without an Eclipse, Exposure Required. *George E. Hale* - - - - - - - - 438
PHOTOGRAPHS of the Milky Way. *E. E. Barnard* - - - - - 10
PHOTOGRAPHY of the Solar Corona without an Eclipse. *A. Riccò* - 18
of the Sun, on the Conditions which Affect the Spectro-. *A. A. Michelson* - - - - - - - - - - - - - 1
PHOTOMETRIC Magnitudes of the Stars, Comparison of. *E. C. Pickering* - - - - - - - - - - - - 154
G. Müller and P. Kempf - - - - - - - - - 428
PICKERING'S Article "Comparison of Photometric Magnitudes of the Stars," Remarks on. *G. Müller and P. Kempf* - - - 428
PLANET, Displacement of Spectral Lines Caused by the Rotation of a. *James E. Keeler* - - - - - - - - - - 352
PLANETS, Spectra of the. *H. C. Vogel* - - - - - - 196, 273
PLANET'S Atmosphere, Determining the Extent of a. *W. W. Campbell* - - - - - - - - - - - 85
PRISM, Objective, New Form of. *F. L. O. Wadsworth* - - - 232
PROMINENCE, Large Eruptive. *George E. Hale* - - - - - 433
PROTUBERANCE Observed December 24, 1894. *J. Fényi* - - 212
PULFRICH'S Modification of the Littrow Specroscope. *James E. Keeler* - - - - - - - - - - - - 353
PULKOWA Refractor, Spectrographic Performance of the. *A. Bélopolsky* - - - - - - - - - - - - 366
RANYARD, Arthur Cowper. *George E. Hale* - - - - - - 168
Recent Publications, pp. 93, 189, 270, 354, 447.
Reviews, pp. 88, 180, 263, 443.
ROTATION of a Planet, Displacement of Spectral Lines Caused by. *James E. Keeler* - - - - - - - - - - - 352
SATURN'S Rings, Spectroscopic Proof of the Meteoric Constitution of. *James E. Keeler* - - - - - - - - - - - 416
SCHMIDT'S Theory of the Sun. *E. J. Wilczynski* - - - - - 112
James E. Keeler - - - - - - - - - - - 178
SILVERING Solutions and Silvering. *F. L. O. Wadsworth* - - 252
SIRIUS in Ancient Times, Color of. *W. T. Lynn* - - - - - 351
SOLAR Atmosphere, Brester's Views as to the Tranquillity of the. *Egon von Oppolzer* - - - - - - - - - - 260
Observations in 1894. *P. Tacchini* - - - - - - - - 210
Spectrum Wave-lengths. *H. A. Rowland* I, p. 29; II, p. 131; III, p. 222; IV, p. 295; V, p. 377.
SPECTRA of Boron and Beryllium. *H. A. Rowland and R. R. Tatnall* 14
of the Planets. *H. C. Vogel* - - - - - - - 196, 273

PAGE.

SPECTRA, Stars having Peculiar. *M. Fleming* - - - - - - 411
of Variable Stars. *E. C. Pickering* - - - - - - - 27
SPECTRAL Lines, Displacement of, Caused by the Rotation of a Planet. *James E. Keeler* - - - - - - - - - 352
SPECTRO-BOLOGRAPHIC Investigations at the Smithsonian Astrophysical Observatory. *George E. Hale* - - - - - - 162
SPECTROGRAPHIC Performance of the Thirty-inch Pulkowa Refractor. *A. Bélopolsky* - - - - - - - - - - - - 366
SPECTRO-PHOTOGRAPHY of the Sun, on the Conditions which Affect the. *A. A. Michelson* - - - - - - - - - - - 1
SPECTROSCOPE, Adapting a Visual Telescope for Photographic Observations with the. *James E. Keeler* - - - - - - 101
New Form of. *C. Pulfrich* - - - - - - - - 335
Pulfrich's Modification of the Littrow. *James E. Keeler* - - 353
Tulse Hill Ultra-Violet. *William Huggins* - - - - - 359
SPECTROSCOPES, Design of Astronomical. *James E. Keeler* - - 248
of the Fixed-Arm Type. *F. L. O. Wadsworth* - - - - 232
the Design of Astronomical. *F. L. O. Wadsworth* - - - 52
SPECTROSCOPIC Proof of the Meteoric Constitution of Saturn's Rings. *James E. Keeler* - - - - - - - - - - - 416
SPECTRUM of Aluminium, Short Wave-lengths of the Spark. *C. Runge* 433
of Argon. *H. F. Newall* - - - - - - - - - - 372
of δ Cephei. *A. Bélopolsky* - - - - - - - - - 160
of Copper. *H. Kayser* - - - - - - - - - - 84
of Germanium. *H. A. Rowland and R. R. Tatnall* - - - 149
of Mars. *Lewis E. Jewell* - - - - - - - - - 311
of Mars, Atmospheric Bands in the. *William Huggins* - - 193
of Nova Aurigæ, Recent Changes in the. *W. W. Campbell* - - 49
Plates, Putting Wave-lengths on. *Olin H. Basquin* - - - 166
Wave-lengths, Tables of Solar. *H. A. Rowland* I, p. 29; II, p. 131; III, p. 222; IV, p. 295; V, p. 377.
SPOT on the Terminator of Mars, Cloud-like. *A. E. Douglass* - - 127
STARS, Comparison of Photometric Magnitudes of the. *E. C. Pickering* 154
G. Müller and P. Kempf - - - - - - - - - - 428
Distribution of in Aquila and Cygnus. *C. Easton* - - - 216
Discovery of Variable, from their Photographic Spectra. *E. C. Pickering* - - - - - - - - - - - - - 27
Having Peculiar Spectra. Eleven New Variable Stars. *M. Fleming* 411
SUN, on the Conditions which Affect the Spectro-Photography of the. *A. A. Michelson* - - - - - - - - - - - 1
Schmidt's Theory of the. *E. J. Wilczynski* - - - - - 112
James E. Keeler - - - - - - - - - - - 178

PAGE.

TELESCOPE and Dome, Combination. *A. E. Douglass* - - - 401
Visual, Adapted to Photographic Observations with the Spectroscope. *James E. Keeler* - - - - - - - - 101
TELESCOPES, Photographic Correcting Lens for Visual. *James E. Keeler* 350
TULSE HILL Ultra-Violet Spectroscope. *William Huggins* - - 359
VARIABILITY of Es.-Birm. 281. *T. E. Espin* - - - - - - 351
VARIABLE STAR Z Herculis. *N. C. Dunér* - - - - - - 285
3416 S Velorum. *James E. Keeler* - - - - - - 262
VARIABLE STARS, Discovery of, from their Photographic Spectra. *E. C. Pickering* - - - - - - - - - - - - 27
Eleven New. *M. Fleming* - - - - - - - - - 411
3416 S VELORUM. *James E. Keeler* - - - - - - - - 262
WAVE-LENGTHS of the Spark Spectrum of Aluminium, Short. *C. Runge* 433
on Spectrum Plates, Device for Putting. *Olin H. Basquin* - - 166
Solar Spectrum. *H. A. Rowland* I, p. 29; II, p. 131; III, p. 222; IV, p. 295; V, p. 377.
WOLSINGHAM Observatory Circular No. 41. *T. E. Espin* - - - 87

For titles of Reviews see table of contents.

INDEX OF AUTHORS.

PAGE.

AMES, J. S., REVIEWS OF:
On the Spectrum of the Electric Discharge in Liquid Oxygen, Air, and Nitrogen. Liveing and Dewar - - - - - 88
On Variations Observed in the Spectra of Carbon Electrodes, and on the Influence of one Substance on the Spectrum of Another. W. N. Hartley - - - - - - - - - 88
Flame Spectra at High Temperatures. II and III. W. N. Hartley - - - - - - - - - - - - 89
Beiträge zur Kenntniss der Linienspectren. J. R. Rydberg - 90
Beiträge zur Kenntniss der Linienspectren. H. Kayser und C. Runge - - - - - - - - - - - - 90
Ueber die Spectra von Zinn, Blei, Arsen, Antimon, Wismuth. H. Kayser und C. Runge - - - - - - - - - 91
The Spectrum Researches of Professor J. M. Eder and E. Valenta - - - - - - - - - - - - 443
BARNARD, E. E. Photographs of the Milky Way - - - - - 10
BASQUIN, OLIN H. Device for Putting Wave-lengths on Spectrum Plates - - - - - - - - - - - - 166
BÉLOPOLSKY, A. The Spectrum of δ Cephei - - - - - - 160
On the Spectrographic Performance of the Thirty-inch Pulkowa Refractor - - - - - - - - - - - 366
CAMPBELL, W. W. Recent Changes in the Spectrum of Nova Aurigæ - - - - - - - - - - - - 49
On Determining the Extent of a Planet's Atmosphere - - 85
CREW, HENRY, REVIEWS OF:
The Luminosity of Gases. III. A. Smithells - - - 266
Popular Scientific Lectures. Ernst Mach - - - - - 267
CROOKES, WILLIAM. Terrestrial Helium (?) - - - - - - 439
DOUGLASS, A. E. A Cloud-like Spot on the Terminator of Mars - 127
A Combination Telescope and Dome - - - - - - 401
DUNÉR, N. C. On the Periodic Changes of the Variable Star Z Herculis - - - - - - - - - - - - - 285
EASTON, C. On the Distribution of the Stars and the Distance of the Milky Way in Aquila and Cygnus - - - - - - 216
ELLERY, R. L. J. Observations of Mars Made in May and June, 1894, with the Melbourne Great Telescope - - - - - 47

PAGE.

ESPIN, T. E. Wolsingham Observatory Circular No. 41 - - - 87
On the Variability of Es.-Birm. 281 - - - - - - 351
FÉNYI, J. On a Very Large Protuberance Observed December 24, 1894 - - - - - - - - - - - - 212
FLEMING, M. Stars Having Peculiar Spectra. Eleven New Variable Stars - - - - - - - - - - - - - 411
FROST, E. B., REVIEWS OF:
Preliminary Report on the Results Obtained with the Prismatic Camera during the Total Eclipse of the Sun, April 16, 1893. J. Norman Lockyer. The Total Solar Eclipse of April 16, 1893. Report on Results Obtained with the Slit Spectroscopes. E. H. Hills - - - - - - - - - 91
Étude sur le spectre de l'étoile variable δ Cephei. A. Bélopolsky - - - - - - - - - - - 263
GERRISH, WILLARD P. Photographic Observations of Eclipses of Jupiter's Satellites - - - - - - - - - - - 146
HALE, GEORGE E. The Astrophysical Journal - - - - - - 80
Spectro-bolographic Investigations at the Smithsonian Astrophysical Observatory - - - - - - - - - 162
Arthur Cowper Ranyard - - - - - - - - - 168
On a New Method of Mapping the Solar Corona without an Eclipse - - - - - - - - - - - - 318
A Large Eruptive Prominence - - - - - - - 433
On a Photographic Method of Determining the Visibility of Interference Fringes in Spectroscopic Measurements - - 435
Note on the Exposure Required in Photographing the Solar Corona without an Eclipse - - - - - - - - 438
Terrestrial Helium (?) - - - - - - - - - - 439
REVIEW OF:
Publications of the Lick Observatory, Volume III - - - 180
HOLDEN, EDWARD S. A Large Reflector for the Lick Observatory - 442
HUGGINS, WILLIAM. Note on the Atmospheric Bands in the Spectrum of Mars - - - - - - - - - - - 193
The Modern Spectroscope. XII. The Tulse Hill Ultra-Violet Spectroscope - - - - - - - - - - - 359
JEWELL, LEWIS E. The Spectrum of Mars - - - - - - 311
KAYSER, H. Note on the Arc-Spectrum of Copper - - - - - 84
KEELER, JAMES E. On a Lens for Adapting a Visually Corrected Refracting Telescope to Photographic Observations with the Spectroscope - - - - - - - - - - - 101
Schmidt's Theory of the Sun - - - - - - - - 178
The Design of Astronomical Spectroscopes - - - - - 248
